New York State Medicaid Fee-For-Service Pharmacy Programs

OVERVIEW OF CONTENTS

NYS Medicaid Fee-For-Service Preferred Drug List

Mandatory Generic Drug Program (Page 77)

State law excludes Medicaid coverage of brand name drugs that have a Federal Food and Drug Administration (FDA) approved A-rated generic equivalent unless a prior authorization is obtained. Drugs subject to the Preferred Drug Program (PDP), Clinical Drug Review Program (CDRP), and/or the Brand Less Than Generic (BLTG) Program are not subject to the Mandatory Generic Program.

Dose Optimization Program (Pages 78–82)

Dose optimization can reduce prescription costs by reducing the number of pills a patient needs to take each day. The Department has identified drugs to be included in this program, the majority of which have FDA approval for once-a-day dosing, have multiple strengths available in correlating increments at similar costs and are currently being utilized above the recommended dosing frequency.

NYS Medicaid Fee-For-Service Clinical Drug Review Program (CDRP)

The Clinical Drug Review Program (CDRP) is aimed at ensuring specific drugs are utilized in a medically appropriate manner.

Under the CDRP, certain drugs require prior authorization because there may be specific safety issues, public health concerns, the potential for fraud and abuse or the potential for significant overuse and misuse.

Prior Authorization

Prior authorization for some drugs subject to the CDRP must be obtained through a representative at the clinical call center. For some drugs subject to the CDRP, only prescribers, not their authorized agents, can initiate the prior authorization process.

Please be prepared to respond to a series of questions that identify prescriber, patient, and reason for prescribing drug, and to fax clinical documentation upon request. Clinical guidelines for the CDRP as well as prior authorization worksheets are available online at https://newyork.fhsc.com/providers/CDRP_about.asp.

The following drugs are subject to the Clinical Drug Review Program:

- fentanyl mucosal agents: https://newyork.fhsc.com/providers/CDRP_fentanyl_mucosal_agents.asp
- palivizumab (Synagis®): https://newyork.fhsc.com/providers/CDRP_synagis.asp
- sodium oxybate products (Xyrem®, Xywav™): https://newyork.fhsc.com/providers/CDRP_xyrem.asp
- somatropin (Serostim®): https://newyork.fhsc.com/providers/CDRP_serostim.asp

The following drug classes are subject to the Clinical Drug Review Program and are also included on the Preferred Drug List:

- Anabolic Steroids: https://newyork.fhsc.com/providers/CDRP_anabolic_steroids.asp
- Growth Hormones for 18 years and older: https://newyork.fhsc.com/providers/CDRP_growth_hormones.asp

NYS Medicaid Fee-For-Service Drug Utilization Review (DUR) Program

Frequency/Quantity/Duration (F/Q/D) Program and Step Therapy parameters are implemented to ensure clinically appropriate and cost effective use of these drugs and drug classes.

For additional Step Therapy and Frequency/Quantity/Duration parameters for drugs and drug classes that are also included on the Preferred Drug List (PDL), please see pages 3 through 60.

Drug / Class Name	Step Therapy (ST) Parameters	Frequency / Quantity / Duration (F/Q/D) Parameters	Additional / Alternate Parameter(s)
Corticotropin (Acthar®) (ACTH injectable)	Requires trial of first-line therapy for all FDA-approved indications, other than infantile spasms. **Note**: Acthar is first line therapy for infantile spasms in children less than 2 years of age – step therapy not required.	**QUANTITY LIMITS:** • Infantile spasms – 30 mL (six 5 mL vials) • Multiple sclerosis – 35 mL (seven 5 mL vials) **DURATION LIMITS:** • Infantile spasms – 4 weeks; indicated for < 2 years of age • Multiple sclerosis – 5 weeks • Rheumatic disorders – 5 weeks • Dermatologic conditions – 5 weeks • Allergic states (serum sickness) – 5 weeks	• Confirm diagnosis of FDA-approved or compendia-supported indication • Not covered for diagnostic purposes

Drug / Class Name	Step Therapy (ST) Parameters	Frequency / Quantity / Duration (F/Q/D) Parameters	Additional / Alternate Parameter(s)

NYS Medicaid Fee-For-Service Brand Less Than Generic (BLTG) Program

On April 26, 2010, New York Medicaid implemented a new cost-containment initiative, which promotes the use of certain multi-source brand name drugs when the cost of the brand name drug is less expensive than the generic equivalent.

In conformance with State Education Law, which intends that patients receive the lower cost alternative, brand name drugs included in this program:

- Do not require "Dispense as Written" (DAW) or "Brand Medically Necessary" on the prescription
- Have a generic copayment
- Are paid at the Brand Name Drug reimbursement rate or usual and customary price, whichever is lower (SMAC/FUL are not applied)
- Do not require a new prescription if the drug is removed from this program

Effective July 11, 2022:

- Kazano®, Nesina® will be **added** to the program effective August 11, 2022
- Diastat®, Diastat® Acudial™, and Catapres-TTS will be **removed** from the program effective July 11, 2022

Concerta®	NuvaRing®	Xeloda®
		Zovirax® cream

**List is subject to change

Please keep in mind that drugs in this program may be subject to prior authorization requirements of other pharmacy programs, promoting the use of the most cost-effective product.

IMPORTANT BILLING INFORMATION

- Pursuant to this program prescription claims submitted to the Medicaid program **do not require** the submission of Dispense as Written/Product Selection Code of '1'; **Pharmacies should submit DAW code 9** (Substitution Allowed by Prescriber but Plan Requests Brand)**.** Pharmacies will receive a NCPDP reject response of "22" which means missing/invalid DAW code if other DAW codes are submitted. The only exception to this is DAW code 1 and "*Brand Medically Necessary"* on the prescription.

NYS Medicaid Fee-For-Service Mandatory Generic Drug Program

State law excludes Medicaid coverage of brand name drugs that have a Federal Food and Drug Administration (FDA) approved A-rated generic equivalent unless a prior authorization is obtained.

Coverage parameters under the Preferred Drug Program (PDP), Clinical Drug Review Program (CDRP), and/or the Brand Less Than Generic (BLTG) Program are applicable for certain products subject to the Mandatory Generic Drug Program (MGDP), including exemptions (as listed below).

Prior Authorization Process

- Prescribers, or an agent of the prescriber, must call the prior authorization line at 1-877-309-9493 and respond to a series of questions that identify the prescriber, the patient, and the reason for prescribing this drug. The Mandatory Generic Program Prescriber Worksheet and Instructions, located at https://newyork.fhsc.com/providers/MGDP_forms.asp, provide step-by-step assistance in completing the prior authorization process.
- The prescriber must write "DAW and Brand Medically Necessary" on the face of the prescription.
- The call line 1-877-309-9493 is in operation 24 hours a day, seven days a week.

Exempt Drugs

- Based on specific characteristics of the drug and/or disease state generally treated, the following brand name drugs are exempt from the program and do **NOT** require PA:

Exempt Drugs	
Clozaril®	Neoral®
Dilantin®	Sandimmune®
Gengraf®	Tegretol®
Lanoxin®	Zarontin®
Levothyroxine Sodium (Unithroid®, Synthroid®, Levoxyl®)	

For more information on the Mandatory Generic Program, please refer to https://newyork.fhsc.com/providers/MGDP_about.asp.

NYS Medicaid Fee-For-Service Dose Optimization Program

On November 14, 2013, the Medicaid Fee-for-Service program instituted a Dose Optimization initiative. Dose optimization can reduce prescription costs by reducing the number of pills a patient needs to take each day. The Department has identified drugs to be included in this program, the majority of which have FDA approval for once-a-day dosing, have multiple strengths available in correlating increments at similar costs and are currently being utilized above the recommended dosing frequency. Prior authorization will be required to obtain the following medication beyond the following limits:

PA requirements are not dependent on the date a prescription is written. New prescriptions and refills on existing prescriptions require PA even if the prescription was written before the date the drug was determined to require PA.

To obtain a prior authorization (PA), please call the prior authorization Clinical Call Center at 1-877-309-9493. The Clinical Call Center is available 24 hours per day, 7 days per week with pharmacy technicians and pharmacists who will work with you, or your agent, to quickly obtain PA.

Medicaid enrolled prescribers with an active e-PACES account can initiate PA requests through the web-based application PAXpress®. The website for PAXpress is https://paxpress.nypa.hidinc.com.

When, in the judgment of the prescriber or the pharmacist, an emergency condition exists, the prescriber or pharmacist can call the Clinical Call center and obtain authorization for a seventy-two hour emergency supply of the drug prescribed to allow time for the prior authorization to be obtained.
