Haloperidol Mesoridazine Sertindole Thioridazine Ziprasidone Tacrolimus Disopyramide Quinine		
---	--	--

***NOTE – List of meds in center column is NOT a complete list. Any product containing the active ingredient shown in the first column will be an interaction with the drug in the third column.**

**The contraindications listed with colchicine are for patients with renal or hepatic impairment.

ARV = antiretroviral; HFA = hydrofluoroalkane (propellant); POS = point of service

Other ARV/Non-ARV drug-drug interactions not included in this table are managed via severity level 1 DDI conflict codes, requiring pharmacist action at the POS.
